## Notes on Tables

# Foreword

The present publication is the result of joint efforts of National Statistical Offices (NSOs) of Brazil, Russia, India and China, emerging great countries which, together, have become known worldwide as the BRIC group.

The need to begin the dissemination of information about these countries, mainly through a publication with selected data, was an issue agreed on in the BRIC Leaders Meeting, held in New York, in September 2009.

In order to carry out this project, and considering the presence of heads of NSOs in the 41st Session of the United Nations Statistical Commission, BRIC countries sent representatives to the First Meeting of BRIC Countries NSOs, held at the office of Brazil's Permanent Mission to the United Nations, in New York, on February 22nd, 2010, a date on which the main directives for this publication were established.

Since Brazil will host the II Summit of Heads of State of the BRIC Countries, in 2010, the Brazilian Institute of Geography and Statistics (IBGE) has organized the first edition of this publication. The date of April 16, when the Summit will be held, was chosen for the release of the first volume of the "Joint Statistical Publication by BRIC Countries".

Considering the short period of time available to produce this publication, information from each country has been reproduced as it is usually presented by the respective NSOs and by other national producers of statistics.

Information, including selected data about economic and social aspects, is displayed in tables organized into thematic chapters. These tables are also available in a CD-ROM which is part of the publication.

In the first volume, BRIC countries NSOs present statistical information shared by the four member states. This publication is the first step towards a common project of harmonization of BRIC statistical information; it consists, therefore, of a new vehicle for the integration of participating countries.

After this initial step, coming volumes of the "Joint Statistical Publication by BRIC Countries" will certainly bring advances regarding coverage and incorporation of statistical information in BRIC countries.

# Notes on Tables

## Chapter 1 General Information

### Table 1.1 – General information – Brazil

#### General

Population density has been derived by dividing the mid-year population with the geographical area.

#### Specific

(1) Population Projection of Brazil in 2009.

(2) Civil Registration System.

### Table 1.3 – General information – India

#### General

Population density has been derived by dividing the population with the geographical. area.

### Table 1.4 – General information – China

#### General

Mid-year population data is from National Survey on Population Changes 2008-2009.

## Chapter 2 Consumer Price Index

### Table 2.2 – Annual Consumer Price Index – Russia – 2005-2009

#### General

Federal statistical observation of consumer prices with the use of "Form 1 for consumer prices and tariffs of goods and services".

### Table 2.3 – Annual Consumer Price Index – India – 2005-2009

#### General

Financial year data (April-March).

#### Specific

(1) Index Number of Consumer Price of Industrial Worker: % increase during 2004-05 & 2005-06 have been derived based on index series with base : 1982=100. However, % increase during 2007-08 & 2008-09 have been derived based on new series w.e.f. January 2006 Index.

### Table 2.4 – Annual Consumer Price Index – China – 2005-2009

#### General

CPI are categorized by purpose into 8 groups: i.e. food, alcohol and tobacco, clothing, family appliance and maintenance services, medical service and personal supplies, communications, entertainment and educational cultural supplies and services, residence. 262 basic headings are selected based on the analysis of programs of expenditure in large values and consuming patterns of urban household expenditure survey, nearly 130 thousand families selected from cities and countryside.

## Chapter 3 Population

**Table 3.1 – Selected Data on Population – Brazil – 2005–2009**

Specific

- (1) Data derived for Population Projection of Brazil by Sex and Age for the Period 1980-2050 - Review 2008.
- (2) Civil Registration System.

**Table 3.2 – Selected Data on Population – Russia – 2005–2009**

Specific

- (1) December 31.
- (2) The data for 2009 are provisional.
- (3) Crude death rate.

**Table 3.3 – Selected Data on Population – India – 2005–2009**

General

- (1) Mid year population is as per Census Projections. Rest of the data are based on Sample Registration System.
- (2) Information on in-migration from other countries is available. But similar information on out-migration from India is not available.

**Table 3.4 – Selected Data on Population – China – 2005–2009**

General

- The 2005 data are estimates from the 2005 National 1% Population Survey, Aged 15-59 population and Aged 60 and over population are estimates from the population proportion of survey point (November 1, 2005), these data had not been directly published. 2006-2009 data are estimates from the 2006-2009 National Survey on Population Changes.
- (1) The data of 2009 is preliminary data.

## Chapter 4 Economic Activity of Population

**Table 4.1 – Selected Data on Economic Activity of Population – Brazil – 2005–2008**

Specific

- (1) Persons 10 years or older.
- (2) Include: Financial intermediation, excluding insurance and pension, Insurance and pension, Activities auxiliary to financial intermediation, Real estate, Rental of vehicles, machinery and equipment without drivers or operators and personal and household goods, Computer-related activities, Research and development, Servicing primarily businesses and Organizations and institutions extraterritorial.

**Table 4.3 – Selected Data on Economic Activity of Population – India – 2005–2009**

General Note

- (1) The Survey Periods of the NSS surveys conducted during 2004-05 and 2005-06 were July 2004-June 2005 and July 2005-June 2006.
- (2) **Usual principal activity status:** It relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity on which a person spent relatively longer time (i.e. major time criterion) during that period is considered as the usual principal activity status of the person.
- (3) **Usual subsidiary economic activity status:** A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference period of 365 days preceding the survey or for a minor period, which is not less than 30 days, during the reference period. The status in which such economic activity was pursued is considered as the subsidiary economic activity status of the person.
- (4) **Usual activity status :** The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person. According to the usual status, workers are those who perform some work activity either in the principal status or subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker

according to the usual status, if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

(5) **Labour Force:** Labour Force comprises of the population (i) working or being engaged in economic activity (work), and (ii) not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work', if the work is available.

(6) **Workers (or employed):** Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers.

#### Specific

(1) **Seeking or available for work (or unemployed)** Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, interme diaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those who were 'seeking or available for work' (or unemployed).

(2) **Unemployment Rate (UR):** UR is defined as the number of persons unemployed per 1000 persons in the labour force (which includes both the employed and the unemployed).

**Table 4.4 – Selected Data on Economic Activity of Population – China – 2005–2009**

#### Specific

(1) **Employed Persons** refer to persons aged 16 and over who are engaged in gainful employment and thus receive remuneration payment or earn business income. This indicator reflects the actual utilization of total labour force during a certain period of time and is often used for the research on China's economic situation and national power.

(2) **Registered Unemployed Persons in Urban Areas** refer to the persons with non-agricultural household registration at certain working ages (16 years old to retirement age), who are capable of working, unemployed and willing to work, and have been registered at the local employment service agencies to apply for a job.

(3) **Registered Unemployment Rate in Urban Areas** refers to the ratio of the number of the registered unemployed persons to the sum of the number of persons employed in various units (minus the employed rural labour force, re-employed retirees, and Hong Kong, Macao, Taiwan or foreign employees), laid-off staff and workers in urban units, owners of private enterprises in urban areas, owners of self-employed individuals in urban areas, employees of private enterprises in urban areas, employee of self-employed individuals in urban areas, and the registered unemployed persons in urban areas.

## Chapter 5 Gross Domestic Product

**Table 5.1 – Selected Data on Gross Domestic Product – Brazil – 2005–2009**

#### General

Data for 2008 and 2009 are derived from quarterly GDP results.

#### Specific

(1) The Annual average exchange rates used is available in Table 13.1 (Chapter 13).

(2) Equivalent to participation in the gross value added at basic prices.

**Table 5.3 – Selected Data on Gross Domestic Product – India – 2005–2009**

#### General

**Financial year data** - The CSO has introduced new series of National Accounts Statistics with Base Year 2004-05 so, the GDP expenditure in 2004-2005 is considered as 100.

**Table 5.4 – Selected Data on Gross Domestic Product – China – 2005–2009**

#### General

Data of 2009 are preliminary estimation.

#### Specific

(1) The Annual average exchange rates used is available in Table 13.4 (Chapter 13).

(2) Volume indices of GDP. The current base period is 2005.

## Chapter 6 Population Living Standard

**Table 6.1 – Selected Data on Population Living Standard – Brazil – 2005–2009**

Specific

- (1) Inflated values based on the INPC September 2008.
- (2) The Annual average exchange rates used is available in Table 13.1 (Chapter 13).
- (3) Percentage of the permanent private households.

**Table 6.2 – Selected Data on Population Living Standard – Russia – 2005–2009**

Specific

- (1) World Standard WHO-by all causes.

**Table 6.3 – Selected Data on Population Living Standard – India – 2005–2009**

General

- (1) The period of NSS Survey conducted during 2006–07 pertains to July 2006–June 2007.
- (2) Data relating to General Physician and Hospital beds relates to calendar year.

Specific

- (1) Average monthly wages pertains to Regular/Salaried Employees of age group 15–59 years and derived from Average daily wages (for 30 days).
- (2) Public expenditure on education and health as percentage of GDP have been derived as per GDP at market price.

**Table 6.4 – Selected Data on Population Living Standard – China – 2005–2009**

Specific

- (1) **Average Annually Wage of Staff and Workers** refers to the average wage level in money terms per staff and workers during a year of time.
- (2) The Annual average exchange rates used is available in Table 13.4 (Chapter 13).
- (3) **Average Real Wage Indices of Staff and Workers** refers to the average wage indices of staff and workers after deducting consumer price index.
- (4) **Consumption Expenditure of Rural Households** refers to expenditures on material life and cultural life, including expenditure on food, clothing, housing, household facilities, articles and services, transport, post & telecommunication, cultural, educational, and recreational products and services, medicine and health care, and other commodities & services.
- (5) **Total Expenditure on Health** reflects the total expenditure on medical and health care services of a country in a year, estimated using funding source method. It includes government expenditure, social expenditure and individual cash expenditure.
- (6) **Regular Institutions of Higher Education** refer to educational establishments set up according to the government evaluation and approval procedures, recruiting graduates from senior secondary schools as the main target by National Matriculation TEST. They include full-time universities, colleges, institutions of higher professional education, institutions of higher vocational education, institutions of higher vocational education and others (non-university tertiary, branch schools and undergraduate classes). Universities and colleges primarily provide undergraduate courses; institutions of higher professional education and institutions of higher vocational education primarily provide professional trainings; and others refer to educational establishments, which are responsible for enrolling higher education students under the State Plan but not enumerated in the total number of schools, including: branch schools of universities and colleges, and universities and colleges that have been approved and under plan for construction. Non-university tertiary refers to the regular undergraduate branch college which is running in new mechanism and mode, excluding the branch schools and other similar branches of educational institutions. The indicator only covers regular undergraduates and college students, including total enrollment in full undergraduate courses and in specialized courses.  
The data of 2009 is preliminary data.
- (7) **Regular Secondary Schools** are classified into regular senior secondary schools and junior secondary schools, including:  
Regular junior secondary school, referring to education establishment providing fundamental secondary education service to graduates of primary school;  
Regular senior secondary school, referring to education establishment providing senior secondary education service to graduates of junior secondary school;

High school, referring to education establishment providing both junior secondary education service and senior secondary education service;

Primary & secondary school, referring to education establishment providing both primary education service and secondary education service. It is classified into 9-year school providing 9-year compulsory education service and 12-year school providing both 9-year compulsory education service and senior secondary education service.

(8) **Vocational Secondary Schools** include vocational junior secondary school and vocational senior secondary school, referring to education establishment ratified by education authority at county level or above to enroll graduates of primary school and junior secondary school and provide junior or senior vocational education service.

(9) **Primary schools** refer to education establishment ratified by education authority at county level or above to children of school age and provide primary education service.

The data of 2009 is preliminary data.

(10) **Special schools** refer to regular or vocational primary or secondary education institutions enrolling children with physical or intellectual disabilities and other special children and teenagers that have demand for special education.

The data of 2009 is preliminary data.

(11) **Pre-primary education institutions** include kindergarten and preschool class.

Kindergarten enrolls three-year-old (and above) preschool children and provides care and education service.

Playing and gaming are the basic education pattern. Education is embedded into playing and gaming.

Establishment of kindergarten shall be approved by education authority at county level or above or town government, and shall be registered in file.

In those regions without the resources of providing three-year preschool education to preschool children, one-year preschool class can be set up to provide one-year preschool education service to preschool children. Preschool class serves as the major form of developing preschool education in rural area and one auxiliary method of solving the problem that there are insufficient kindergartens in some urban areas.

The data of 2009 is preliminary data.

(12) **Physicians** refer to licensed (assistant) doctors. Licensed assistant doctors refers to the medical workers who have obtained the licenses of qualified (assistant) doctors and are employed in medical treatment, disease prevention or healthcare institutions, excluding the licensed (assistant) doctors engaged in management job. The classification of licensed (assistant) doctors is clinician, Chinese medicine, dentist and public health.

Number of Licensed (Assistant) Doctors per 1000 Population the formula is:

Number of Licensed Doctors per 1000 Population = (Number of Licensed Doctors + Number of Licensed Assistant Doctors) / Population × 1000

The population is the figure of household registration from the Ministry of Public Security.

The data of 2009 is preliminary data.

(13) **Floor Space of Residential building in Rural Areas** refer to the floor space of the houses that the rural household owns or hires, where the household lives and can live. It includes the living rooms integrated with houses or the space of kitchen range as well as the special kitchen rooms but excludes the area for production purposes such as special warehouses.

## Chapter 7 Environment

Table 7.1 – Selected Data on Environment – Brazil – 2009

Specific

- (1) Surface hydric availability, derived from measurements of long period by Hydrographic Region.
- (2) Flow generated in Brazil.

Table 7.2 – Selected Data on Environment – Russia – 2005–2008

Specific

- (1) The Federal Service for Hydrometeorology and Monitoring of the Environment of the Russian Federation (Roshydromet). Statistical monitoring of fresh water resources. The data on total volume of river run-off for the year.
- (2) Rosstat. Federal statistical monitoring of selected protected federal nature areas. Data on the number and total area of the state nature reserves and national parks.
- (3) Rosstat. Federal statistical monitoring of atmospheric air pollutant emissions from stationary sources. Data on emissions of sulfur dioxide per resident population by the end of the year.

- (4) Rosstat. Federal statistical monitoring of atmospheric air pollutant emissions from stationary sources. The data on emissions of nitrogen oxide converted to NO<sub>2</sub> per resident population by the end of the year.
- (5) Rosstat. Federal statistical monitoring of atmospheric air pollutant emissions from stationary sources. Data on emissions of carbon monoxide per resident population by the end of the year.
- (6) Rosstat. Calculations based on information derived from forms of statistical observations. The data on environmental protection expenditures in % of GDP in national currency at current prices.

**Table 7.3 – Selected Data on Environment – India – 2008–2009**

Specific

- (1) BDL Below Detection Level.

**Table 7.4 – Selected Data on Environment – China – 2005–2009**

Specific

- (1) **Nature Reserves Areas** refer to certain areas of land, waters or sea that are representative in natural ecological systems, or are natural habitats for rare or endangered wild animals or plants, or water conservation zones, or the location of important natural or historic relics, which are demarked by law and put under special protection and management. Nature reserves are designated by the formal approval of governments at and above county level (including those approved by relevant departments or "revolutionary committees" before 1980). Scenic spots and cultural preservation zones are not included.
- (2) **Emissions per capita of sulfur dioxides** refers to ratio of total volume of sulfur dioxide emission to the annual average population for the reference year.
- (3) **Investment in the Treatment of Environment Pollution** refers to the proportion of investment in fixed assets in the total investment in harnessing industrial pollution and in the construction of urban environment infrastructure facilities. It includes investment in harnessing sources of industrial pollution, investment in environment protection facilities designed concurrently with construction projects, and investment in urban environment infrastructure facilities.

## Chapter 8 Industry

**Table 8.2 – Selected Data on Industry – Russia – 2005–2009**

Specific

- (1) The Industrial Production Index is an aggregated index by the kinds of economic activity "Mining and quarrying", "Manufacturing" and "Electricity, gas and water supply" adjusted for informal economic activity.
- (2) Federal statistical observation of consumer prices with the use of "Form 1 for producer prices of industrial goods" conducted by Rosstat.

**Table 8.3 – Selected Data on Industry – India – 2005–2009**

Specific

- (1) Based Index of Industrial Production.
- (2) Based on Whole Sale Price Index.
- (3) % age change of Volume Indices of Industrial Production and Producers Price Indices have been derived.
- (4) The figures against production of steel relates to Finished Steel Product.
- (5) Figures against production of fertilisers are related to Nitrogenous and phosphatic fertilisers.

**Table 8.4 – Selected Data on Industry – China – 2005–2009**

General

Production of iron ore, washing machines, paper and paperboard, cotton woven fabrics, woolen woven fabrics and leather footwear of 2008 and 2009 are preliminary data.

Specific

- (1) **Volume indices of industrial production** in China refers to the indices of the PPI-deflated Value Added of Industry (% to the previous year) covering (industrial enterprises above the designated size industrial enterprises with annual revenue from principal business over 5 million yuan).
- (2) **Producer Price Indices for Manufactured Goods** reflect the trend and degree of changes in general ex-factory prices of all manufactured goods during a given period, including sales of manufactured goods by an industrial enterprise to all units outside the enterprise, as well as sales of consumer goods to residents. It can be used to analyze the impact of ex-factory prices on gross output value and value-added of the industrial sector.

(3) **Production of passenger cars** only includes the production of basic passenger cars. The production of MPV and SUV are not included.

(4) **Production of fertilizers** is calculated on the basis of 100% effective content.

(5) **Sawnwood** refers to manufactured woods using wood sawing machine or manual tools to process log into formation of wood of certain width and thickness of sectional dimensions (the) along longitudinal direction.

## Chapter 9 Agriculture, Forestry and Fishing

**Table 9.1 – Selected Data on Agriculture, Forestry and Fishing – Brazil – 2005–2009**

Specific

(1) Rice, oat, rye, barley, corn, Sorghum, wheat and triticale.

(2) Avocado, pineapple, banana, persimmon, cashew, coconut, fig, guava, orange, lemon, apple, papaya, mango, passion fruit, quince, melon, melon, walnut, pear, peach, tangerine and grape.

(3) Data for 2009 are preliminary.

(4) Planted and native wood.

**Table 9.2 – Selected Data on Agriculture, Forestry and Fishing – Russia – 2005–2009 Specific**

(1) The data by the Federal Service of State Registration, Land Register and Mapping (Rosreestr).

(2) Calculations by Rosstat based on the data derived from federal statistical observation forms.

(3) Calculations by Rosstat based on the data derived from federal statistical observation forms. Fruits (including nutiferous), berries, citruses and grape.

(4) Calculations by Rosstat based on the data derived from federal statistical observation forms. Data for 2009 are provisional.

(5) Catch of fish and sea products.

(6) Calculations by agricultural organizations, made by Rosstat on the basis of the data derived from the federal statistical observation form for fertilizer application and data from the Federal Service of State Registration, Land Register and Mapping (Rosreestr) on arable lands.

(7) The Federal Forestry Agency (Rosleshoz). State monitoring of forest resources was performed every five years until 2008 and since then it is performed on the basis of data from the State forest registration annually. Data on forest areas of forest resources and other wooded land are shown in the table.

**Table 9.3 – Selected Data on Agriculture, Forestry and Fishing – India – 2005–2009**

General

(1) The Agriculture year is from July-June.

Specific

(1) The livestock figures relates to 2003.

(2) And consumption of fertilizers relates to 2001-02.

**Table 9.4 – Selected Data on Agriculture, Forestry and Fishing – China – 2005–2009**

Specific

(1) **Index of gross output value of agriculture, forestry, animal husbandry and fishery (previous year =100):** Gross output value of agriculture, forestry, animal husbandry and fishery at Comparable prices ÷ Gross output value of agriculture, forestry, animal husbandry and fishery at Current prices.

(2) **Cereals:** including rice, wheat, barley, Hullessbarley, rye, oats, corn, sorghum, chestnuts, millet of Graminee, etc. and buckwheat of Polygonaceae, not including the tubers and beans. Cereal crop yields are calculated just after being threshed.

(3) **Sugar crops:** including sugar cane and sugar beet.

(4) **Potatoes** included in grain statistics, its yield is calculated according to 5kg fresh potato off 1kg grain.

(5) **Output of poultry eggs** refers to production of poultry eggs(including chickens darks and geese ), refers to the production of the whole country.

(6) **Catch aquatic production** refers to total catch aquatic production catch in natural water area, including freshwater yield and sea water yield.

(7) **Large and medium-sized tractor** refers to the tractors with power rating over 14.7KW (including 14.7KW, i.e.20 horsepower). There are two types, i.e. caterpillar tractors and wheel tractors.

(8) **Small tractor** refers to tractors with power rating above 2.2KW(including 2.2KW) and below 14.7KW, including small four-wheel tractors and walking tractors.

(9) **Combine harvester**: refers to the harvester that can simultaneously perform several operations (such as harvesting and threshing) during the process of harvesting, such as grain harvester and cotton harvester (cotton picking machine). There are two types, i.e. dragged harvester and auto-walking harvester.

(10) **Wooded area** refers to the area of forest where trees and bamboo grow with canopy density above 0.2, including land of natural woods and planted woods, but excluding bush land and thin forest land. It reflects the total areas of afforestation. The figure from the 6<sup>th</sup> (1999–2003), 7<sup>th</sup> (2004–2008) national forest inventory.

## Chapter 10 Transport

**Table 10.2 – Selected Data on Transport – Russia – 2005–2009**

Specific

- (1) Data for 2009 will be available in June 2010.
- (2) The data are produced and disseminated by the Federal Highway Agency of the Ministry for Transport of the Russian Federation and Rosstat. Length of general auto-motor roads.
- (3) The data on lorries and cars, buses and coaches owned by persons and legal entities, produced by GIBDD (the Traffic Police Department) of the Ministry of Interior of the Russian Federation.
- (4) The calculations on number of registered cars, owned by persons, made by Rosstat on the basis of data produced by GIBDD (the Traffic Police Department) of the Ministry for Interior of the Russian Federation.
- (5) The data are produced by GIBDD (the Traffic Police Department) of the Ministry for Interior of the Russian Federation.

**Table 10.3 – Selected Data on Transport – India – 2005–2009**

Specific

- (1) **Operating length of railway** line as on March. For example, March 2005 for the year 2004–05.
- (2) **Length of roads** as on March 2004.
- (3) **Road traffic accidents**: Data for 2004–05 relate to calendar year 2004, and so on.

**Table 10.4 – Selected Data on Transport – China – 2005–2009**

General

Data of 2009 are preliminary data.

Specific

- (1) **Possession of Civil Vehicles** refers to the total numbers of vehicles that are registered and received vehicles license tags according to the Work Standard for Motor Vehicles Registration formulated by the Transport Management Office under the department of public security at the end of the reference period.
- (2) **Passenger cars per 1,000 population** is the volume of small and mini passenger automobiles owned by per thousand people. The small automobiles are those less than 6000mm and less than or equal to the number of passenger cars 9, but not including the mini-passenger automobiles. The mini-passenger automobiles are those less than or equal to 3500 mm, whose engine cylinders are less than or equal to the total displacement of 1000 ml.
- (3) **Road Traffic Accident** includes four types: extraordinary serious accidents, serious accidents, ordinary accidents and minor accidents.  
The data of 2009 is preliminary data.

## Chapter 11 Selected Data on Information Society

**Table 11.1 – Selected Data on Information Society – Brazil – 2005–2009**

Specific

- (1) Density - the calculation of the density of fixed lines installed and in service is carried out based on projected monthly population data by the IBGE.
- (2) Density - the density calculation of personal mobile access is performed based on projected monthly population data by the IBGE.

**Table 11.2 – Selected Data on Information Society – Russia – 2005–2009**

- (1) The data are produced and disseminated by the Ministry for Communication of the Russian Federation (Minsvyaz). The data for 2009 are provisional.
- (2) Data for 2009 will be available in June and July 2010.

- (3) Regular sample surveys of household's budgets conducted by Rosstat.
- (4) Per 100 rural households.
- (5) Share of households with Internet access as a percentage of total households.
- (6) All the newspapers without breakdowns by periodicity. Data for 2009 will be available in August 2010.

#### Table 11.4 – Selected Data on Information Society – China – 2005–2009

##### Specific

- (1) The data of 2009 is the preliminary accounting data, while that of the year 2005 to 2008 is the final accounting data.
- (2) **Internet user.** The estimated number of inhabitants who are more than 6 years old and have connected with Internet at least once in the last 6 months.
- (3) **Newspapers** refer to those with China standard periodical number.

### Chapter 12 Finance

#### Table 12.1 – Selected Data on Finance – Brazil – 2005–2009

##### Specific

- (1) The Annual average exchange rates used is available in Table 13.1 (Chapter 13).
- (2) Average rate of bank certificates of deposit – CBD. Data published by the IMF / IFS.
- (3) Weighted average rate on bank loans with fixed rates. Table 12.3 – Selected Data on Finance – India – 2005–2009

#### Table 12.2 – Selected Data on Finance – Russia – 2005–2009

##### Specific

- (1) The data are produced and disseminated by the Treasury of the Russian Federation. Expenditures of consolidated (General government) budget, incl. state non-budget funds. The data for 2009 are provisional.
- (2) The data are produced and disseminated by Central Bank (end of the year).
- (3) Refinancing rate (end of the year)

#### Table 12.3 – Selected Data on Finance – India – 2005–2009

##### General

- (1) Zero interest rate is prevailing on current Deposit.

##### Specific

- (1) Represent compensation and assignments by States to local bodies and Panchayati Raj institutions.
- (2) Data relate to major public sector banks which are scheduled commercial banks as per Second Schedule of the Reserve Bank of the India Act, 1934.
- (3) BPLR: Bench Mark Prime Lending Rate.

#### Table 12.4 – Selected Data on Finance – China – 2005–2009

##### Specific

- (1) The Annual average exchange rates used is available in Table 13.4 (Chapter 13).

### Chapter 13 External Economic Relations

#### Table 13.1 – Selected Data on External Economic Relations – Brazil – 2005–2009

##### Specific

- (1) The Annual average exchange rates used is available in this Table (Annual average exchange rates, in national currency/US dollar – FOB = Free on Board).

#### Table 13.2 – Selected Data on External Economic Relations – Russia – 2005–2009

##### Specific

- (1) The data are produced and disseminated by the Bank of Russia.
- (2) The data produced by the Bank of Russia. The data on market value of the goods exported is shown at point the customs frontier of the economy from which they are exported (f.o.b.) excluding expenses on transport to the land border of the country, from which they are exported. The data on market value of the goods imported is

shown at point the customs frontier of the economy from which they are exported (f.o.b.) including expenses on transport to the land border or the port of shipment of the country, from which they are exported.

(3) The data are calculated on the basis of statistical information from the Federal Customs of Russia and the data on external trade with the Republic of Belarus. Export of goods is the transport of goods from the customs territory of the Russian Federation with no liability to return them. Export includes the transport of domestic goods from the country and re-export of goods as well. The domestics include foreign made goods imported into the country and processed significantly to change their main qualities and technical characteristics. Re-export includes goods, which were imported to the customs territory of the Russian Federation and then transported from this territory without charge of customs duties and taxes or with reimbursement of the ones paid and without applying economic embargo and restrictions to these goods. Market value of the goods exported is recorded at f.o.b. prices in the country, from which they are exported;

Import of goods is the transport of goods into the customs territory of the Russian Federation without liabilities of re-export. Imported goods are the goods imported for own consumption in the economy and goods intended for re-import. Re-imported goods are the goods transported out of the customs territory of the Russian Federation and then transported into this territory without charge of custom duties, taxes and without applying economic embargo and restrictions to the goods. Market value of the goods imported is recorded at c.i.f. prices in the country, from which they are imported, including expenses on insurance and transport of goods to the frontier of the country, from which they are imported;

The export of goods from the Russian Federation in 2009 (in %): the Netherlands - 12,0; Italy - 8,3; Germany - 6,2; China - 5,5; Turkey - 5,4; USA - 3,1; France - 2,9; India - 2,0 and Brasilia - 0,4. In the imports - supplies from Chine prevailed and were - 13,6%; from Germany - 12,7; USA - 5,5; France - 5,0; Italy - 4,7; the Netherlands and Brasilia - 2,1; Turkey - 1,9 and India - 0,9.
